Execu/Tech Systems Secure Payment Processing with Shift4

Execu/Tech certifies Shift4's DOLLARS ON THE NET® payment gateway

Las Vegas, Nevada (May 20, 2008) – Execu/Tech Systems Inc., a technology development and integration firm specializing in complete hospitality solutions for over 25 years, has certified an interface with Shift4 Corporation, a supplier of secure payment processing services. Execu/Tech completes development for Shift4's DOLLARS ON THE NET® with Tokenization technology to deliver fast, reliable and secure payment processing.

“Thanks to Shift4's tokenization technology, we are able to assure our hospitality clients that their guests' critical credit card information is maintained with absolute maximum security,” said Wayne Johnson, CEO, Execu/Tech Systems, Inc.

Shift4 is dedicated to protecting cardholder data and to upholding the credit/debit card security requirements (PCI DSS) of the various card associations. Shift4's DOLLARS ON THE NET is based on Tokenization technology – developed and publicly released by Shift4 in 2005 – that provides world-class security by removing the merchants responsibility for storing and maintaining credit card information at the point-of-sale systems.

Shift4's DOLLARS ON THE NET is a web-based payment gateway. It is integrated into Execu/Tech Systems hospitality solution to provide high-speed and low-cost authorizations and settlements for credit card transactions.

“Shift4 is proud to certify Execu/Tech's hospitality system for a scalable, cost-effective gateway. By implementing a secure payment processing solution across a diverse user base, Execu/Tech reinforces their commitment customer confidence while protecting their brand,” said Dave Oder, President and CEO, Shift4 Corporation.

About Execu/Tech

Execu/Tech Systems is a technology development and integration firm specializing in complete hospitality solutions for over 25 years. Execu/Tech's all-in-one hotel management software suite is installed in large and small hotels, luxury inns, resorts, condos, and marinas worldwide.

About Shift4 Corporation

Shift4, a leading developer of secure financial transaction processing software and services, provides web-based, real-time enterprise payment solutions for leaders in the hospitality, retail, foodservices, auto rental and e-commerce markets. Through connectivity to most major processors, DOLLARS ON THE NET provides both high speed and low cost authorizations and settlements for credit, debit, check, private label and gift card transactions. DOLLARS ON THE NET also includes the ability to access, review and edit transactions prior to settlement, as well as a searchable, 24-month

archive of transactions for reporting and charge back defense. For more information, contact John Mann, Vice President of Sales, (702) 597-2480 x43200 or jmann@shift4.com, or visit www.shift4.com.
